MAI BUI

buim@cua.edu · maipbui.github.io

EDUCATION

The Catholic University of America, Washington, D.C., USA   Jan 2018 – Dec 2020
B.Sc. in Computer Science, Double Minors in Mathematics and Data Analytics   GPA: 3.77/4.0
Coursework: Data Structures, Machine Learning, Data Analytics, Software Engineering, Web Programming.

WORK EXPERIENCE

Medstar National Rehabilitation Network, Washington, D.C., USA
Engineering Intern   Aug 2020 - Present
· Working on EEG signal processing, developing data acquisition, and writing Matlab scripts for neurorehabilitation research.
· Utilizing data analysis and interpretation methods to the neurophysiology of stroke recovery.

The Catholic University of America, Washington, D.C., USA
Web Specialist   May 2018 - Present
· Using Cascade Server CMS to develop new content and workflow on the website to ensure highest quality.
· Implementing campaign emails, collected leads' data, and provided weekly reports on Saleforce.
· Managing daily social media across several platforms to meet group's advertising goals.

Rehabilitation Engineering Research Center DC, Washington, D.C., USA
Research Intern   May 2019 – Aug 2019
· Utilized deep learning and Intel Realsense SDK to assess the development of hand grasp and predict future outcomes in infants at risk for motor delay.
· Collaborated with a group of researchers to deliver outstanding results on multiple projects by performing exceptional research, communication, and project-management skills.
· Collected and recorded home-based data with several participants for later assessment and analysis.

PROJECTS

Autonomous Driving Robot   Aug 2019 – May 2020
· Developed an autonomous robot using NVIDIA Jetson Nano board and Raspberry Pi Camera.
· The robot can avoid obstacles, keep track of the lane lines, and recognize determined traffic signs.
· Deep learning frameworks: PyTorch, Tensorflow.

Home assessment of grasp development in infants at risk for fine motor delay   May 2019 – Aug 2019
· Assessed spontaneous hand use using video capture (Intel Realsense D435) and interactive grasp force with instrumented toys in infants.
· Signaled potential avenues for early interventions to encourage object exploration & functional hand use.
· Performed different deep learning approaches: DeepLabCut, OpenPose, Deep High Resolution HRNet.

TECHNICAL SKILLS

Programming Languages   Python, Java, R, C/C++, MATLAB
Web Programming   HTML, CSS
Frameworks/Libraries   NumPy, Matplotlib, scikit-learn, pandas, PyTorch, Tensorflow, PyQt

CERTIFICATES

Intro to Machine Learning with Tensorflow, Udacity
Machine Learning, Stanford University, Coursera
Intro to Self-Driving Cars, Lyft, Udacity

HONORS & AWARDS

Grace Hopper Celebration of Women in Computing Scholarship   2020
Pope Francis Engineering School Scholarship in Catholic University   2018 - Present
Dean's List   2018 – Present
